Project Statement

Domain: Python Programming

Project 1: Rock–Paper–Scissors Game (Python Console App)
Project Title: Rock–Paper–Scissors Game (Python Console App)

Project Objective:
To create a console-based Rock–Paper–Scissors game where the user plays against the computer. This project helps interns practice basic Python syntax, decision-making, and randomization.

Technologies to Use:
- Python 3.x

Tasks Breakdown:
1. Take user input (rock, paper, scissors).
2. Generate a random computer choice.
3. Compare choices and determine the winner.
4. Display user choice, computer choice, and result.
5. Allow multiple rounds until the user quits.
6. (Optional) Keep a scoreboard.

Submission:
Submit the project folder in ZIP file.
Submit the .py source file.
The ZIP will includes all files that used to create the project and Project Report PDF file.
